

CHERNOBYL AND KYIV - POST-APOCALYPTIC ADVENTURE

14-17 MAY 2020

Chernobyl Exclusion Zone is one of **the most fascinating places on Earth**. That's why more than 20,000 tourists from all over the world visit the Chernobyl zone each year. This **unique and out-of-this-world place** is a must-see for every extreme traveler and adventurer.

Chernobyl tour

Thanks to experts and local professionals that helped create the tour you are about to witness; you will travel back in time to 1986. One shall therefore not call this a tour, but rather an exploration of the secrets and history of the Soviet era. Prepare to get close to the well-known **V.I. Lenin Nuclear Power Plant**, to see **the ghost city of Pripyat** and **the secret military radar Duga**. See for yourself how nature overcomes what mankind left over. You may also meet so-called "Self-settlers", local inhabitants who survived and returned back to the zone in the years following the evacuation.

Prepare to receive facts and real life stories about the whole project, the accident and the evacuation that followed. Moreover, be ready for myths and rumors about Duga radar, one of the biggest and most useless Soviet military object that can be seen still standing.

Buildings, signs, slogans and military technique – these will all drag you back into the communist era and leave an imprinted memory FOREVER.

Safety of the Chernobyl exclusion zone

Our guides are specially trained to only lead you on safe roads and paths.

During the visit to the Chernobyl exclusion zone, you will go through dosimetric control several times a day. On top of that, the group will be given at least two Geiger-Müller counters (free of charge) which measure the radiation level constantly. Compared to the radiation level at the time of the Chernobyl accident, the radiation level in the Chernobyl exclusion zone today, it is much, much lower. Most of the places visited in the Chernobyl zone on this trip contain radiation levels lower than natural, everyday radiation.

You can check the current level of radiation in Chernobyl zone on the official Ukrainian government website [HERE](http://srp.ecocentre.mns.gov.ua/MEDOPS/index.php?lang=ENG&online=1) (<http://srp.ecocentre.mns.gov.ua/MEDOPS/index.php?lang=ENG&online=1>).

Radiation Precautions

The official rules for when in the zone, only allow clothes covering most of the body - trousers, long-sleeved shirt or jacket, closed footwear (better on thick sole).

The zone is a lot less dangerous now and you will be provided with all the equipment needed, including tubes that measure radiation.

In the Chernobyl zone it is forbidden to:

- Carry any kind of weapons
- Drink alcohol or take drugs
- Eat food or smoke in the open air
- Touch any structures or vegetation
- Sit or place any photo and video equipment on the ground
- Take any items outside the zone
- Violate dress code (no open-type shoes, shorts, trousers, skirts)
- Gather, use or bring vegetable and cattle-breeding products (vegetables, fruits, berries, mushrooms, plants, fish etc.), which were cultivated in the area of the exclusion zone
- Bring in or bring out any animals (dogs, cats etc)
- Drink water from wells, rivers and other open water sources. You must only use water from the Chernobyl water supply system or water from stores

When leaving the Chernobyl zone, it is necessary to:

- Pass compulsory radiation control of clothes, footwear and personal items
